Specimen Type		
Collector Name	Collection Date/ Time	Collection Site
☐ Office ☐ Lab ☐ Home ☐ Other		

Confirmation of Medical Necessity for Genetic Testing:

I certify that I am a licensed healthcare provider (or authorized representative/genetic counselor) ordering genetic testing. I confirm that the patient has been informed of the purpose, scope, limitations, and potential risks of this testing, has had the opportunity to ask questions and seek genetic counseling, and has provided informed consent, which is on file. I attest that this testing is medically necessary and will be used in the clinical management of the patient. I further confirm that the patient authorizes **Revive Genetics** to release relevant information to third-party payors for reimbursement purposes, to receive direct payment for services rendered, and, where applicable, to act as the patient's designated representative for insurance appeals. I acknowledge that the patient understands and accepts financial responsibility for any amounts not covered by insurance, including payments made directly to the patient.

Adult Metabolic, Wound Care & Healing Disorders Panel

Requisition & Consent Form

Test Selection

Select	Panel	Genes	Brief Description
	Express Gene™ Comprehensive Adult Metabolic, Wound Care & Healing Disorders (wound) Panel	278 Genes	Assesses inherited genetic variants that may impair tissue repair and wound healing through abnormalities in collagen synthesis, connective tissue integrity, vascular function, immune regulation, and metabolic pathways.
	Express Gene™ Wound Healing Disorder Genes	85 Genes	Identifies inherited genetic variants that may impair wound healing by affecting collagen synthesis, connective tissue integrity, angiogenesis, immune regulation, inflammation, extracellular matrix remodeling, and tissue regeneration.
	Express Gene™ Hemochromatosis	7 Genes	Identifies inherited genetic variants associated with abnormal iron metabolism and excessive iron accumulation, supporting the evaluation of hereditary hemochromatosis and related iron overload disorders.
	Express Gene™ Hypercholesterolemia	28 Genes	Identifies inherited genetic variants associated with abnormal cholesterol metabolism and lipid transport, supporting the evaluation of familial hypercholesterolemia and other inherited disorders that increase cardiovascular disease risk.

Indications for Testing (Check All That Apply)

☐ Diagnostics
 ☐ Family History
 ☐ Recurrent or Unexplained Infections
 ☐ Patient Management

Clinical Information

Genetic Testing Done Previously: ☐ Yes ☐ No
 If Yes what test: _____
 Date of Previous Test: ____/____/____

The panel includes all genes listed below. If only specific gene(s) are requested, please select them below.
 For the complete list of genes included in each Subpanel, please refer to our company's website:

ABCB8, ABCD4, ABCG2, ABCG5, ABCG8, ACADM, ACADS, ACADVL, ACAT1, ACE, ACSF3, ACSM3, ADD1, ADIPOQ, ADSL, AGTR1, AKT2, ALAD, ALAS2, ALDH16A1, ALDH18A1, ALDH2, ALDH5A1, ALDH6A1, ALDH7A1, ALDOB, AMACR, ANGPTL3, ANO10, APOA2, APOA5, APOB, APOC2, APOC3, APOE, ARMS2, AUH, BDNF, BMP2, BTBD, CACNA1S, CAVIN1, CBS, CD14, CD320, CILP2, CLCN1, CLDN16, CLDN19, CLPX, CNNM2, COL1A1, COL3A1, COQ6, CPOX, CPS1, CREB3L3, CRP, CTLA4, CTNS, CTSD, CXCL10, CXCL8, CXCR1, CXCR2, CXCR4, CYP11B2, CYP17A1, DEFB1, DPYD, EGF, EGFR, EGLN2, ENOS, EPHX2, FCGR, FCGR2A, FECH, FGF1, FGF10, FGF12, FGF13, FGF14, FGF16, FGF17, FGF18, FGF19, FGF2, FGF20, FGF22, FGF23, FGF3, FGF4, FGF5, FGF6, FGF7, FGF8, FGF9, FGFBP1, FGFRI1, FGFRI1OP, FGFRI2, FGFRI3, FGFRI4, FTH1, FTL, FTO, FXR2, GALE, GALK1, GALT, GCK, GCKR, GHR, GIF, GIPR, GLA, GPD1, GPD2, GPHN, GPIHBP1, HADH, HADHA, HAMP, HFE, HJV, HMBS, HNF1A, HNF1B, HNF4A, IDE, IFNA1, IFNAR1, IFNG, IFNGR1, IFNGR2, IGF1R, IGF2, IGF2BP2, IL10, IL1A, IL1B, IL1RN, IL36B, IL6, INS, INS-IGF2, INSIG2, INSR, IRS1, IVD, KCNA1, KCNJ11, KCTD15, LDLR, LDLRAP1, LEP, LIPC, LMBRD1, LMF1, LPL, LTA, LYZ, MBL2, MC4R, MCCC1, MCCC2, MAAA, MMAB, MMACHC, MMADHC, MMP1, MMP10, MMP11, MMP12, MMP13, MMP14, MMP15, MMP16, MMP17, MMP19, MMP2, MMP20, MMP21, MMP23B, MMP24, MMP25, MMP3, MMP7, MMP8, MMP9, MMUT, MPV17, MTHFR, MTR, MTRR, MTP, NFE2L2, NOD1, NOS3, NPPA, PAH, PCBD1, PCCA, PCCB, PCSK9, PDGFB, PDHA1, PDHX, PDP1, PDX1, PDZK1, PHKG2, PLIN1, POMC, PPARG, PPOX, PPP1R17, PRODH, PRPS1, PTPN22, PTS, QDPR, RAC1, SH2B1, SH2B3, SLC12A3, SLC16A1, SLC22A11, SLC22A5, SLC25A13, SLC25A20, SLC25A40, SLC2A2, SLC2A9, SLC30A10, SLC30A8, SLC39A4, SLC3A1, SLC40A1, SLC6A19, SLC6A8, SLC7A9, SOD2, TBC1D4, TCF7L2, TCN2, TFR2, TGFB1, TIMP1, TIMP2, TIMP3, TIMP4, TLR1, TLR10, TLR2, TLR3, TLR4, TLR5, TLR6, TLR7, TLR8, TLR9, TNF, TNFRSF41, TRPM6, UCP1, UCP2, UCP3, UROD, UROS, VDR, VEGFA, VEGFC, WFS1, HP, AGA, AGT

List relevant family history of disease (affected family members and relationship to patient):

Adult Metabolic, Wound Care & Healing Disorders Panel

Requisition & Consent Form

Informed Consent

Consent to Testing and Use of Results

I confirm that the submitted specimen belongs to the identified patient and has been voluntarily provided for analysis by **Revive Genetics**. I authorize the laboratory and my healthcare provider to analyze my clinical and genetic information, perform the ordered metabolic and wound healing genetic testing, release test results to the ordering healthcare provider, and disclose information necessary for billing and reimbursement to my insurance carrier, when applicable.

Consent for Adult Metabolic, Wound Care & Healing Disorders Genetic Testing

Your healthcare provider has ordered an **Adult Metabolic, Wound Care & Healing Disorders Genetic Panel** to evaluate genes associated with inherited disorders that may affect metabolism, connective tissue integrity, tissue repair, collagen synthesis, vascular function, immune regulation, inflammation, and other biological processes essential for normal wound healing and metabolic health. Depending on the test ordered, this may include evaluation for conditions such as hereditary wound healing disorders, connective tissue disorders, hereditary hemochromatosis, familial hypercholesterolemia, and other inherited metabolic conditions that may contribute to impaired healing or increased disease risk. Genetic testing may identify disease-causing (pathogenic) variants, likely pathogenic variants, variants of uncertain significance (VUS), or no clinically significant findings. A positive result may help confirm a diagnosis, guide medical management, identify at-risk family members, support treatment decisions, or provide information regarding inherited disease risk. However, a positive result does not predict the severity, age of onset, response to treatment, or progression of disease, and a negative result does not eliminate the possibility of a genetic disorder.

Please be aware of the following limitations:

This test analyzes only the genes included in the selected panel.

Some genetic changes, including deep intronic variants, balanced chromosomal rearrangements, epigenetic alterations, low-level mosaicism, structural variants, or variants in genes not included on the panel, may not be detected.

Some metabolic and wound healing disorders are caused by genes or variants that have not yet been identified or fully understood.

Variants of Uncertain Significance (VUS) may be identified. These findings currently have insufficient evidence to determine whether they are disease-causing and should not be used alone for medical decision-making.

Genetic testing results should always be interpreted together with your medical history, family history, physical examination, laboratory findings, imaging studies, and other clinical information.

Additional laboratory testing, biochemical studies, imaging, targeted genetic testing, deletion/duplication analysis, or broader genomic testing may be recommended based on your clinical presentation and family history.

Genetic counseling is recommended before and/or after testing to discuss the potential benefits, limitations, and implications of your results for you and your biological relatives.

By signing this consent form, you acknowledge that:

You understand the purpose, benefits, and limitations of metabolic and wound healing genetic testing.

You understand that testing may identify inherited variants that have implications for your biological relatives.

You understand that results may identify unexpected or uncertain findings that could require additional medical evaluation.

You understand that your results will be reviewed by your ordering healthcare provider and may be discussed with you by your physician or a qualified genetics professional.

You voluntarily consent to undergo the requested genetic testing.

Methodology Limitations

Next-generation sequencing (NGS) has inherent technical limitations. Certain types of genetic variants may not be detected by this methodology, including some structural rearrangements, repeat expansions (when not specifically included in the assay), low-level mosaic variants, or variants located in genomic regions with limited sequencing coverage.

Testing is limited to the genes and variant types validated for the ordered assay.

All test results are treated as confidential and are released only to the patient, the ordering healthcare provider, and other individuals authorized by the patient or required by law. No tests other than those authorized will be performed. Patient specimens will be retained for up to **60 days** following completion of testing and then destroyed according to laboratory policy unless otherwise required.

I have read this consent form, or it has been read to me. I have received satisfactory answers to my questions and understand that I may ask additional questions at any time. I voluntarily consent to the requested genetic test.

Consent / Insurance Release

By signing this form, I authorize **Revive Genetics** to submit medical information related to this testing to my designated insurance carrier for reimbursement when necessary. I authorize payment of benefits directly to **Revive Genetics**. I understand that I am responsible for any charges not covered by my insurance, including but not limited to non-covered, non-authorized, or denied services. I authorize a copy of this authorization to be used in place of the original.

Patient or Parent/Guardian Signature: _____ Date: _____

Print Name: _____

Optional Consent for Research and Future Contact

To improve genetic testing, advance the understanding of inherited metabolic disorders, connective tissue disorders, and disorders affecting wound healing, I voluntarily authorize **Revive Genetics** to use any remaining specimen, de-identified genetic data, and/or clinical information for research, educational, quality improvement, or laboratory development purposes. My identity will not be disclosed in any publication or research activity.

I also authorize **Revive Genetics** to contact me in the future regarding newly discovered disease-associated genes, updated variant classifications, research opportunities, or clinically relevant follow-up related to my testing.

Participation is voluntary and declining this consent will not affect the performance of my ordered test or my medical care.
